

Cihan Basoglu

Edmonton, AB | cihanbasoglu57@gmail.com | <https://www.linkedin.com/in/kings/>

Summary I am an all-around data professional with experience across data engineering, software engineering, product analytics, and data science.	Technologies Python, Apache Airflow, SQL, GCP, BigQuery, AWS, PostgreSQL, TypeScript, Express.js, Git, Tableau, ETL/ELT
---	---

Professional Experience

visorPRO (T1 Technology) — *Full-time Remote, Alberta, Canada*

Jr. Software Developer — *Nov 2025 – ...*

- Owned data extraction and ingestion workflows, database updates, and data quality processes.
- Built and maintained data connections, handled access coordination with clients and third-party platforms, ensured data quality, and developed data mining solutions using Python and SQL.
- Worked on the development and maintenance of RAG components using PostgreSQL and AWS.
- Built backend and frontend features and fixed bugs using Express.js and TypeScript.
- Developed a continuous pipeline that ingested GA4 data into BigQuery, transformed the data with SQL, and delivered reporting through Looker Studio.

Joygame Publishing — *Full-time Remote, Istanbul, Turkey*

Data Engineer — *Jan 2025 – Sep 2025 (9 mos)*

Jr. Data Engineer — *Sep 2023 – Jan 2025 (1 yr 5 mos)*

Data Analyst Intern — *May 2023 – Sep 2023 (5 mos)*

- Had full ownership of production pipelines: debugging, updates, and stakeholder requests.
- Designed and maintained Python and Airflow ETL pipelines integrating 20+ data sources (GA4, Firebase, AppsFlyer, AppLovin, Meta, Play Store, App Store, and more).
- Automated manual Excel workflows and built API integrations with JSON, Parquet, CSV, TSV.
- Led product analytics efforts by developing deep knowledge of data caveats, processing logic, and user behavior metrics.
- Optimized BigQuery SQL queries, cutting costs by 50% (from \$300 to \$150 per month, saving \$1,800 annually) through CTEs, partitioning, clustering, and table size reduction.
- Implemented medallion architecture in BigQuery for efficient layered data processing.
- Delivered 30+ Tableau dashboards, covering marketing, finance, and game performance KPIs.
- Identified data quality issues, communicated findings, and advised leadership on architecture.
- Documented data flows, schemas, and logic; mentored and evaluated new candidates.

The New York Global Institute of Linguistics — *Contract Remote, New York, US*

Teaching & Technical Assistant — *Jun 2022 – Jan 2024 (1 yr 8 mos)*

- Assisted in coordination, teaching, and student recruitment for global linguistics seminars.
- Supported leading professors (M. den Dikken, S. Wurmbrand, J.F. Bailyn, etc.).
- Designed lesson plans, evaluated assignments, and instructed on syntax and semantics.

Education

PhD in Linguistics (discontinued) - Ankara University, Turkey, 2021–2026

MSc in Cognitive Science - Middle East Technical University, Turkey, 2022–2024

MA in Linguistics - Ankara University, Turkey, 2018–2021

BA in Linguistics - Istanbul University, Turkey, 2013–2018

Certifications

2025 - Google Cloud Professional Data Engineer, Google.

2025 - dbt Fundamentals, dbt Labs.

2024 - Apache Airflow DAG Authoring, Astronomer.

2024 - Apache Airflow Fundamentals, Astronomer.

2024 - Databricks Fundamentals, Databricks.

2023 - IBM Data Analyst, IBM.
